

DISABILITY CASE STUDY

Safer, Faster Credential Management

Oho enables a Large Disability Organisation to centralise worker accreditations, streamline processes, and verify accreditations for 6,500 staff across Australia.

This large disability organisation supports thousands of people with complex intellectual, physical and multiple disabilities across Australia. Oho is proud to support them in achieving their mission.

CHALLENGE

This organisation is committed to providing and enabling the best possible support for the community, and prioritises the importance of client safeguarding and child safety. They are committed to ensuring all staff are safe to work with vulnerable clients.

With operations across a range of Australian locations to provide vital care, this organisation have deployed Oho to ensure all employees have the appropriate and valid checks in place every week, and to ease the significant compliance administration burden.

Now with Oho's full automation, they have full confidence that their employees are verified and have the right to work at all times.

RESULTS

- 6,500 employees verified weekly across a range of credentials
- Oho has conducted nearly 1 million verifications for for this organisation
- 8,000+ hours of administration saved
- 1,000+ expiry events identified
- 3 red flags detected since 2021

The large disability organisation uses Oho to manage the administration and verification of Working With Children Checks, NDIS Worker Screening Checks, AHPRA Registrations and Visa Entitlement (VEVO).

IMPACT

“OHO has automated the process of manually verifying the currency of required employee accreditations across the business. This both saves time and provides us with confidence that if something changes we'll be notified.

Knowledge of these changes as quickly as possible is vital to our ability to maintain safety at our locations for both clients and employees.”

Large Disability Organisation

“To see this organisation taking this seriously and leading the way in their industry is a great demonstration of how tech can support safeguarding, and give organisations like this the time they need to focus on care for their clients”

Claire Rogers,
Oho Co-Founder
